Remarks:

AIC SOLUTIONS

A PERSONALIZED SOFTWARE FOR AGARWAL'S INVEST CARE

ACKNOWLEDGEMENT

We are truly grateful and proud to present our project, **AIC Solution**, created for **Agarwal Invest Care**. This journey has been full of learning, growth, and teamwork, made possible with the help and support of many wonderful people.

we are very grateful to **Agarwal Invest Care** for giving us the chance to work on this project. Their trust and encouragement inspired us to create the best solution we could.

We sincerely thank **Anupam Singh**, Head of Department, for his constant guidance, encouragement, and valuable advice throughout this project. His support has motivated us to work hard and achieve our goals.

We would like to convey our gratitude to **Md. Khurshid Alam**, in our Faculty for the good of during the class period of our course Coordinator and All our course faculty members. His knowledge, feedback, and belief in us have been key to completing this project successfully.

A special thanks to our team members, whose hard work, creativity, and cooperation made this project possible. Everyone's contributions have been important in making this experience unforgettable.

We would like to thank all the faculty members and our lab teachers for sharing their knowledge and helping us with practical skills. Their support and patience have been invaluable during this journey.

DECLARATION

We hereby declare that the project titled “AIC Solution”, submitted as part of the curriculum for the 6th semester of the Bachelor of Computer Applications program at Arcade Business College, Patna, is a genuine and original work carried out by us.

This project has been completed under the expert guidance of Anupam Singh, Head of Department, Arcade Business College, Patna.

INTRODUCTION: AGARWAL'S INVEST CARE

Agarwal's Invest Care, established in 2007, is a premier service sector company dedicated to providing a wide range of intangible financial products. Owned by Narendra Mohan Agarwal.

The company prides itself on its personalized and professional services. The ownership status of the company is sole proprietorship.

Currently, Agarwal's Invest Care is managing Assets Under Management (AUM) worth 109 Crores. Located at M/S Agarwal's Invest Care, in front of Axis Bank, Arya Kumar Road, Rajendra Nagar, Patna, Bihar, India 800016.

Team Size

The company has a team of three dedicated employees:

1. Ajay Kumar
2. Janardan Kumar
3. Dada

Our Services

Agarwal's Invest Care offers a diverse portfolio of financial products, including:

1. Equity & Derivatives
2. Commodity Market
3. Mutual Funds
4. Fixed Deposits (FD) & Recurring Deposits (RD)
5. Life Insurance
6. General Insurance
7. Motor Insurance
8. Government Bonds

Benefits of a Financial Consultant

A financial consultant can provide numerous benefits to individuals, including:

Expert Advice: Financial consultants offer expert advice tailored to your specific financial situation and goals. They help you make informed decisions about investments, savings, and insurance.

Personalized Financial Planning: They create personalized financial plans that align with your short-term and long-term objectives, ensuring that your financial resources are managed effectively.

Risk Management: Consultants help you identify and manage financial risks, providing strategies to protect your assets and investments.

Tax Efficiency: They offer guidance on tax-efficient investment strategies, helping you minimize tax liabilities and maximize returns.

Time Savings: Managing finances can be time-consuming. A financial consultant handles the complexities, allowing you to focus on other important aspects of your life.

Peace of Mind: Knowing that a professional is managing your finances can provide peace of mind, reducing stress and uncertainty about your financial future.

Company's Mission

Agarwal's Invest Care is currently managing assets under management (AUM) worth 109 crores rupees, demonstrating its expertise and trustworthiness in the financial services industry.

The company's mission is to provide our clients with the best financial solutions tailored to their individual needs, ensuring their investments are secure and profitable. With a commitment to excellence and a customer-centric approach, Agarwal's Invest Care continues to be a trusted name in the financial services industry.

LIMITATION OF THE EXISTING SYSTEM

1.Storage and Space:

Physical Space: Paper documents require physical storage space, which can become cumbersome and expensive as the volume of documents grows.

Organization: Managing and organizing large volumes of paper documents can be challenging and time-consuming.

2.Accessibility and Retrieval:

Limited Access: Accessing paper documents often requires physical presence, making it difficult for remote access.

Slow Retrieval: Finding specific information in a large stack of paper documents can be slow and inefficient.

3.Security and Privacy:

Vulnerability: Paper documents are susceptible to damage from fire, water, and other environmental factors.

Unauthorized Access: Ensuring the security and privacy of paper documents can be difficult, as they can be easily misplaced or accessed by unauthorized individuals.

4.Data Integrity and Accuracy:

Human Error: Manual data entry and processing are prone to human errors, which can affect the accuracy and integrity of the data.

Duplication: Managing duplicates and ensuring data consistency can be challenging with paper documents.

5.Cost and Efficiency:

Operational Costs: The cost of paper, printing, storage, and maintenance can add up over time.

Time-Consuming: Manual processes are often slower and less efficient compared to automated software solutions.

OBJECTIVE OF THE PROJECT

1.Storage and Space:

Digital Storage: Software systems store data digitally, reducing the need for physical storage space.

Scalability: Digital storage can be easily scaled to accommodate growing data volumes.

2.Accessibility and Retrieval:

Remote Access: Software systems allow for remote access, enabling users to access information from anywhere with an internet connection.

Quick Retrieval: Advanced search functionalities enable quick and efficient retrieval of specific information.

3.Security and Privacy:

Data Protection: Software systems can implement robust security measures, such as encryption and access controls, to protect data.

Audit Trails: Software systems can maintain audit trails to track access and modifications to data.

4.Data Integrity and Accuracy:

Automation: Automated data entry and processing reduce the risk of human errors and improve data accuracy.

Consistency: Software systems can enforce data validation rules to ensure consistency and integrity.

5.Cost and Efficiency:

Reduced Operational Costs: Digital systems reduce the need for paper, printing, and physical storage, leading to cost savings.

Increased Efficiency: Automated processes are faster and more efficient, improving overall productivity.

H/W AND S/W REQUIREMENTS

➤ Software Requirements

- **Technology**: Desktop Application.
- **Front end**: Visual Basic 6.0
- **Back end**: Oracle 10g.
- **Operating System**: Microsoft windows XP or above

➤ Hardware Requirements

- **Processor** : Intel Pentium or more
- **Motherboard** : Intel Chipset Motherboard.
- **Ram**: 128 MB or more
- **Cache**: 512 KB
- **Hard disk**: 16 GB hard disk recommended

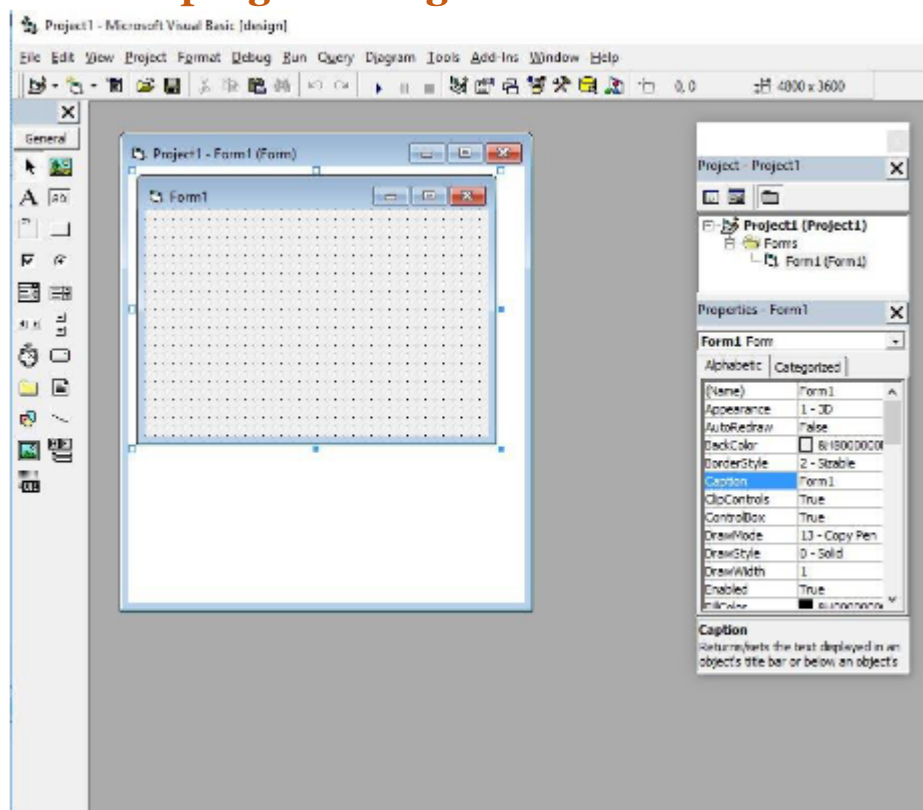

INTRODUCTION TO VB 6.0

Visual Basic 6.0 (VB6) is a programming language developed by Microsoft, which became popular in the late 1990s. It is a high-level programming language that allows developers to create applications with a Graphical User Interface (GUI) through its drag-and-drop functionality. VB6 is part of the Visual Basic family and focuses on simplicity and rapid application development (RAD), making it ideal for beginners and experienced programmers alike.

Key Features of VB6.0:

- **Event-driven programming:** Code is executed based on user interactions like clicks, inputs, or other events.

- **Integrated Development Environment (IDE):** VB6 provides a powerful IDE to design GUIs, write code, and debug applications.
- **Object-based:** While not fully object-oriented, it supports features like encapsulation and modular programming.
- **Database support:** Built-in support for database access through ADO, DAO, and RDO technologies.
- **Component-based:** Allows integration with ActiveX controls and DLLs

VB6 is versatile and supports the creation of various Types of applications, including:

Desktop Applications:

- Inventory management systems
- Employee or payroll management systems
- Hotel or restaurant management systems

Data-driven Applications:

- Database management tools
- Reporting applications using Crystal Reports or Microsoft Access integration

Games:

- Basic 2D games using VB6's graphics capabilities

Utility Tools:

- File management utilities (e.g., file Renamer, batch processing tools)
- Custom calculators

Web-Enabled Applications:

- With additional tools, you can build simple web applications or integrate VB6 applications with web technologies.

Automation Applications:

- Automating repetitive tasks in Windows using VBScript.

- **The VB6 IDE is where you design, code, and test your applications. Its components include:**

Menu Bar:

Contains standard menus like *File*, *Edit*, *View*, *Project*, and more for managing your project.

Toolbox:

Provides controls like buttons, text boxes, labels, and combo boxes that you can drag onto forms to design the user interface.

Form Designer:

A graphical workspace where you design the application's interface.

Project Explorer:

Displays all the files in your project, such as forms, modules, and class modules, in a tree view.

Properties Window:

Used to set properties of the selected object (e.g., font, color, size) at design time.

Code Editor:

Where you write the application's logic in VB6's syntax.

Debugging Tools:

Tools to help find and fix errors in your code, such as the Immediate window and breakpoints.

Object Browser:

Allows you to explore objects, methods, and properties available in your project.

INTRODUCTION TO ORACLE 10G

Oracle 10g for Desktop-Based Applications

Oracle 10g can be used as a backend database for **desktop-based applications**, enabling them to store, retrieve, and manage data efficiently. Desktop applications often rely on robust database systems like Oracle 10g to handle their data needs, ensuring high performance and reliability.

Key Uses in Desktop Applications

Standalone Applications: Applications such as inventory management systems, payroll software, or accounting tools use Oracle 10g to store and process large volumes of data locally or on a network.

Data Storage and Retrieval: Oracle 10g serves as the central database where the desktop application can execute SQL queries to handle CRUD operations (Create, Read, Update, Delete).

Rich Features for Desktop Integration:

PL/SQL Programming: Allows the embedding of business logic in the database, reducing the need for extensive application-side coding.

Data Integrity: Provides strong data consistency and integrity through constraints and triggers.

Connectivity: Oracle 10g can connect with desktop applications written in languages like Java, C#, VB.NET, or even VB6 through technologies such as:

ODBC (Open Database Connectivity)

JDBC (Java Database Connectivity)

Oracle Data Provider for .NET (ODP.NET)

Report Generation: Applications can use Oracle 10g with reporting tools (e.g., Crystal Reports or Oracle Reports) to generate detailed and interactive reports.

Security: Ensures secure data access through user roles, privileges, and encryption, making it ideal for desktop systems that require confidentiality.

Benefits of Using Oracle 10g for Desktop-Based Applications

Scalability: Can handle small-scale applications while being scalable to enterprise levels if needed.

High Availability: Supports continuous operations with minimal downtime.

Performance Optimization: Features like indexing, partitioning, and query optimization improve desktop application performance.

Examples of Desktop-Based Applications Using Oracle10g

Library Management Systems: Manages books, members, and transactions.

Point-of-Sale Systems: Handles billing, inventory, and sales data.

Healthcare Management Systems: Tracks patient records, appointments, and prescriptions.

Educational Management Systems: Maintains student records, grades, and fees.

MODULE DESCRIPTION

1. **Login Module**
2. **Employee Management Module**
3. **Salary Calculation Module**
4. **Report Generation Module**
5. **Administration Module**

Login Module:

Provides secure access to the system using role-based authentication.

Input File Name:-

Output File Name:-

Employee Management Module:

Maintains employee records, including personal details and attendance.

Input File Name:-

Output File Name:-

Salary Calculation Module:

Automates the computation of basic salary, allowances, and deductions.

Input File Name:-

Output File Name:-

Report Generation Module:

Generates salary slips and summary reports for auditing.

Input File Name:-

Output File Name:-

Administration Module:

Manages user roles and system configurations.

Input File Name:-

Output File Name:-

E-R DIAGRAM

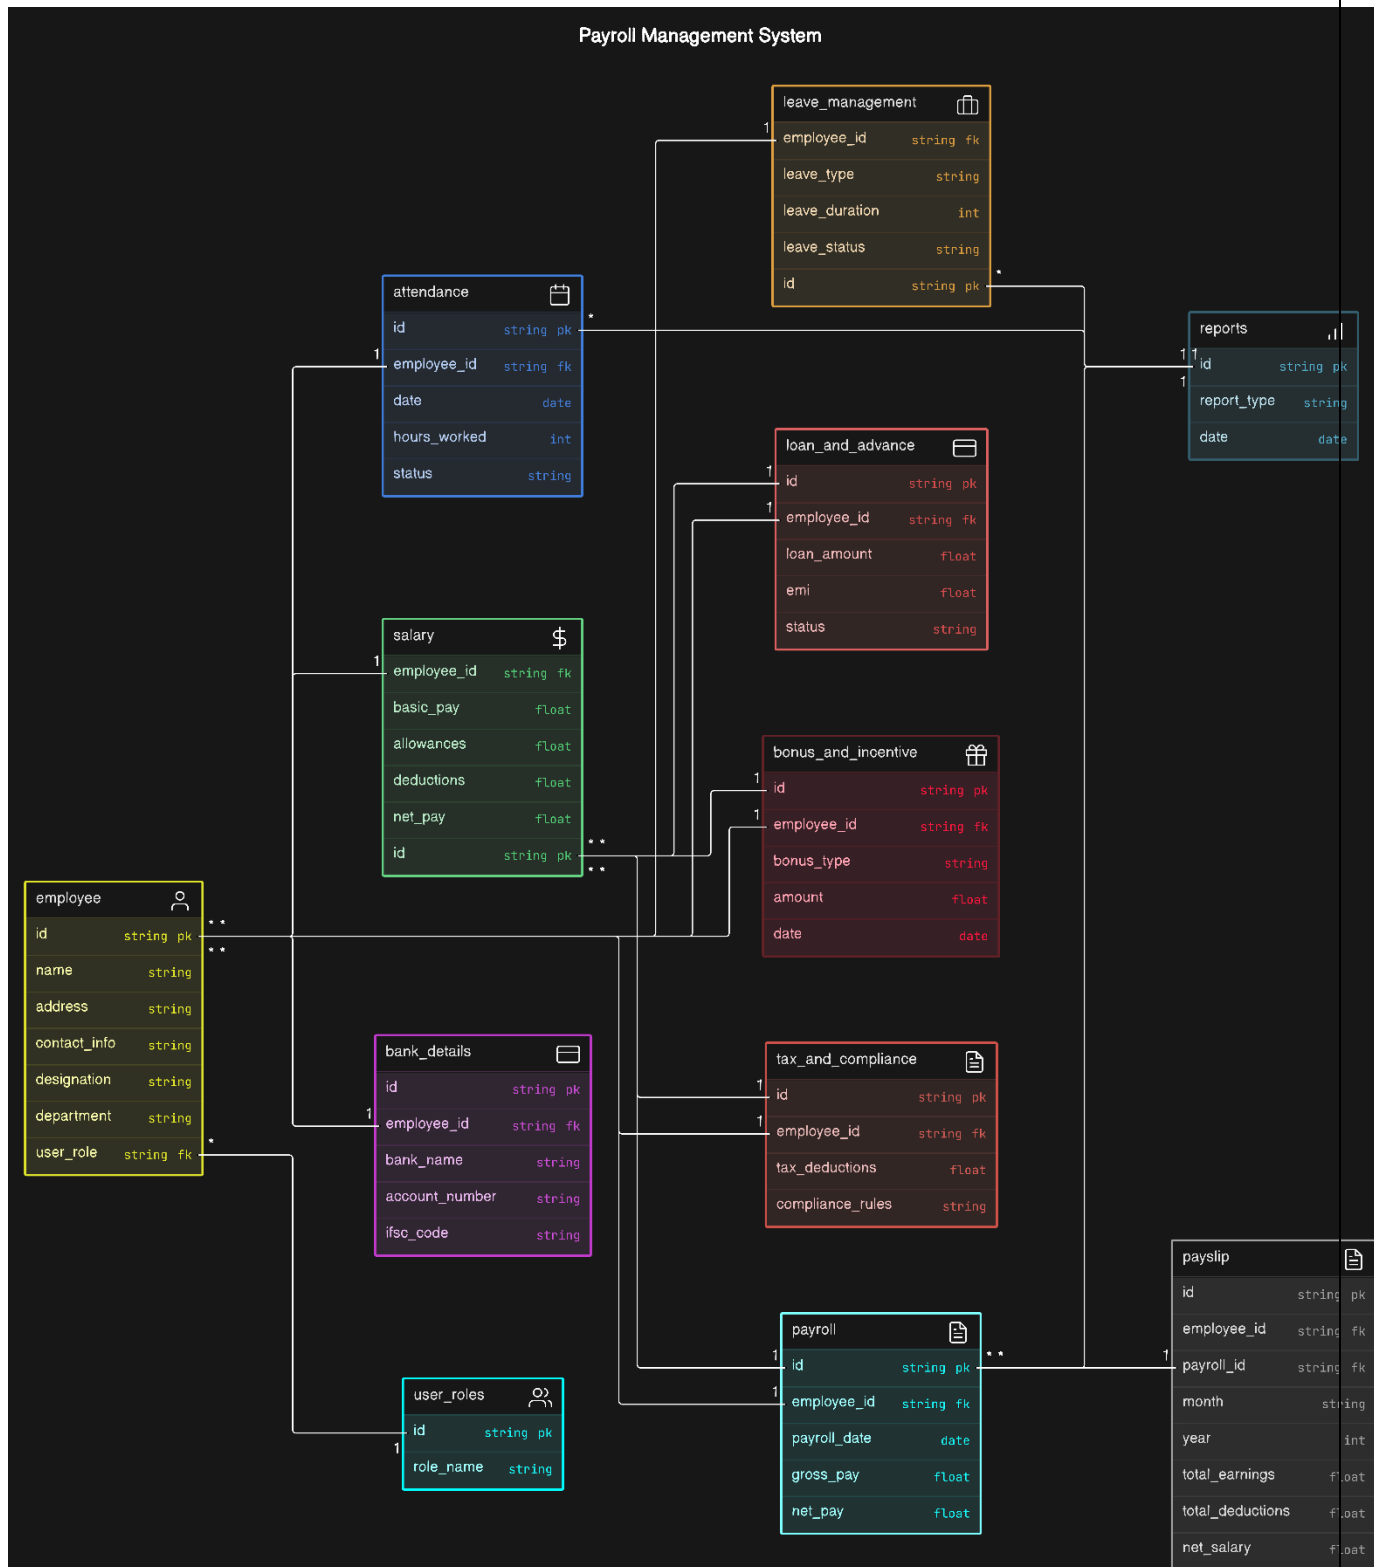

TABLE DESCRIPTION

1.EMPLOYEE TABLE

SrNO.	Column Name	Data Type	Size	Constraints	Description
1	EMP_ID	VARCHAR2	6	Primary Key, NOT NULL, UNIQUE	Unique identifier for each employee.
2	EMP_FNM	VARCHAR2	50	NOT NULL	Employee's first name.
3	EMP_LNM	VARCHAR2	50	NULLABLE	Employee's last name (optional).
4	DOB	DATE	-	NULLABLE	Employee's date of birth.
5	GNDR	CHAR	1	CHECK (Gender IN M,F,T,O)	Gender of the employee.(M='Male', F='Female', T=TRANSGENDER O= 'Other')
6	LN1	VARCHAR2	20	NOT NULL	ADDRESS
7	LN2	VARCHAR2	20	NOT NULL	ADDRESS
8	LN3	VARCHAR2	20	NOT NULL	ADDRESS
9	LANDMARK	VARCHAR2	20	NOT NULL	ADDRESS
10	DISTRICT	VARCHAR2	15	NOT NULL	ADDRESS
11	STATE	VARCHAR2	15	NOT NULL	ADDRESS
12	COUNTRY	VARCHAR2	15	NOT NULL	ADDRESS
13	PINCODE	CHAR	6	NOT NULL	ADDRESS
14	PHNO	CHAR	10	UNIQUE, NOT NULL	Employee's contact number.
15	WPHNO	CHAR	10	UNIQUE, NOT NULL	Employee's WHATSAPP contact number.
16	EPHNO	CHAR	10	UNIQUE, NOT NULL	Employee's EMERGENCY contact number.
17	EMAIL	VARCHAR2	100	UNIQUE, NOT NULL, VALID EMAIL FORMAT	Employee's email address.

18	DOJ	DATE	-	NOT NULL	The date when the employee joined the organization.
19	DESG	VARCHAR2	10	NOT NULL	Job title or role of the employee.
20	DEPT	VARCHAR	10	NULLABLE	Department where the employee works.
21	TYPE	CHAR	1	CHECK IF 'F','C','P'	Type of employment.(F='FULLTIME', 'C'='Contractual', 'P'=Part-time))
22	STATUS	CHAR	1	CHECK (Status IN ('A', 'I')), NOT NULL	Indicates the current employment status.'A'='Active', I='Inactive'))

2. SALARY TABLE

SrNO	Column Name	Data Type	Size	Constraints	Description
1	SAL_ID	VARCHAR2	6	Primary Key, NOT NULL, UNIQUE	Unique identifier for each salary record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	BASIC_PAY	DECIMAL	7,2	NOT NULL, CHECK (BasicPay >= 0)	Basic salary of the employee before any additions or deductions.
4	ALLOWANCES	DECIMAL	7,2	NULLABLE, CHECK (Allowances >= 0)	Total allowances provided to the employee (HRA, DA, etc.).
5	DEDUCTIONS	DECIMAL	7,2	NULLABLE, CHECK (Deductions >= 0)	Total deductions from the salary (PF, TDS, loans, etc.).
6	GROSS_SAL	DECIMAL	7,2	NOT NULL, GENERATED ALWAYS AS (BasicPay + Allowances) STORED	Total salary before deductions. Calculated as BasicPay + Allowances.
7	NET_SAL	DECIMAL	7,2	NOT NULL, GENERATED ALWAYS AS (GrossSalary - Deductions) STORED	Final salary after deductions. Calculated as GrossSalary - Deductions.
8	PAY_PERIOD_SDT	DATE	-	NOT NULL	Start date of the salary payment period.

9	PayPeriodEndDate	DATE	-	NOT NULL	End date of the salary payment period.
---	------------------	------	---	----------	--

3. COMPLIANCE TABLE

SrNO	Column	DATATYPE	SIZE	CONSTRAINTS	DESCRIPTION
1	COMP_ID	VARCHAR2	6	Primary Key, NOT NULL, UNIQUE	Unique identifier for each compliance record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	TDS	DECIMAL	6,2	DEFAULT 0, CHECK (TDS >= 0)	Amount deducted as Tax Deducted at Source (TDS).
4	PF	DECIMAL	6,2	DEFAULT 0, CHECK (PF >= 0)	Employee's contribution towards the Provident Fund.
5	ESI	DECIMAL	6,2	DEFAULT 0, CHECK (ESI >= 0)	Employee State Insurance contribution by the employee.
6	PROF_TAX	DECIMAL	6,2	DEFAULT 0, CHECK (PROF_Tax >= 0)	Tax deducted as professional tax from the employee.
7	TAXABLE_INC	DECIMAL	6,2	NOT NULL, CHECK (TAXABLE_INC >= 0)	Income subject to taxation after applicable deductions

4. ATTENDANCE TABLE

SrNO	COL	Data Type	Size	Constraints	Description
1	ATTD_ID	VARCHAR2	10	Primary Key, NOT NULL, UNIQUE	Unique identifier for each attendance record.
2	EMP_ID	VARCHAR2	10	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	DATE	DATE	-	NOT NULL, UNIQUE WITH EmployeeID	The date of the attendance entry.
4	STATUS	CHAR	1	CHECK (Status IN ('P', 'A', 'L')), NOT NULL	Indicates whether the employee was present, absent, or on leave. (P='Present', A='Absent', L='Leave')
5	SHIFT_IN	TIME	-	NULLABLE	The time the employee started their shift.

6	SHIFT_OUT	TIME	-	NULLABLE	The time the employee ended their shift.
7	OVERTIME	DECIMAL	5,2	DEFAULT 0, CHECK (OVERTIME >= 0)	Number of hours worked beyond the standard shift.
8	TOT_WRKHRS	DECIMAL	5,2	DEFAULT 0, CHECK (TOT_WRKHRS >= 0)	Total number of hours worked during the shift, including overtime

5. BANK TABLE

SrNO	Column Name	Data Type	Size	Constraints	Description
1	BANK_ID	VARCHAR2	6	Primary Key, NOT NULL, UNIQUE	Unique identifier for each bank record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	ACC_NM	VARCHAR2	40	NOT NULL	Name of the account holder as per bank records.
4	BK_NM	VARCHAR2	40	NOT NULL	Name of the bank where the account is held.
5	ACC_NO	VARCHAR	17	UNIQUE, NOT NULL	Unique account number of the employee.
6	IFSC	VARCHAR2	11	NOT NULL, VALID FORMAT (e.g., ^[A-Z]{4}0[A-Z0-9]{6}\$)	Indian Financial System Code for identifying the bank branch.
7	BK_BRANCH	VARCHAR2	25	NOT NULL	Name of the branch where the account is maintained.

6. LEAVE TABLE

SNO	Column Name	Data Type	Size	Constraints	Description
1	LV_ID	VARCHAR2	6	Primary Key, NOT NULL, UNIQUE	Unique identifier for each leave record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	LV_TYPE	CHAR	1	CHECK (LV_TYPE IN ('S','C','P','O')), NOT NULL	Type of leave requested S='Sick', C= 'Casual', P= 'Paid', O='Other'
4	LV_SDT	DATE	-	NOT NULL	The start date of the leave period.
5	LV_EDT	DATE	-	NOT NULL, CHECK (EndDate >= StartDate)	The end date of the leave period.

6	TOT_LV	DECIMAL	5,1	NOT NULL, CHECK (NumberOfLeaveDays >= 0)	Total number of days of leave, calculated or entered manually.
7	LV_STATUS	CHAR	1	CHECK (LV_STATUS IN ('A', 'R', 'P')), DEFAULT 'P', NOT NULL	Current approval status of the leave request. L= LEAVE,P= PENDING,A=APPROVED

7. PAYROLL TABLE

SNO	Column NM	Data Type	Size	Constraints	Description
1	PRL_ID	VARCHAR2	6	Primary Key, NOT NULL, UNIQUE	Unique identifier for each payroll record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	PAY_PERIOD	DATE	7	NOT NULL, CHECK (FORMAT MM/YYYY)	The month and year of the payroll, formatted as MM/YYYY.
4	TOT_EARN	DECIMAL	7,2	NOT NULL, CHECK (TOT_EARN >= 0)	Total earnings for the payroll period, including allowances.
5	TOT_DEDUCT	DECIMAL	7,2	NOT NULL, CHECK (TOT_DEDUCT >= 0)	Total deductions for the payroll period, including TDS, PF, etc.
6	NET_SAL	DECIMAL	7,2	GENERATED ALWAYS AS (TOT_EARN - TOT_DEDUCT) STORED, NOT NULL	Final salary after deductions. Calculated automatically.
7	PMT_DT	DATE	-	NULLABLE	The date on which the payment was made.
8	PMT_STATUS	CHAR	1	CHECK (PMT_STATUS IN ('P','U')), DEFAULT 'U', NOT NULL	Indicates whether the salary has been paid or not.P='Paid',U='Unpaid'

8.LOAN TABLE

SNO	Column Name	Data Type	Size	Constraints	Description
1	LN_ID	VARCHAR2	7	Primary Key, NOT NULL, UNIQUE	Unique identifier for each loan record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	LN_TYPE	VARCHAR2	15	NOT NULL	Type of loan or advance (e.g., Personal, Housing).
4	LN_AMT	DECIMAL	8,2	NOT NULL, CHECK (LN_AMT >= 0)	Total sanctioned loan or advance amount.
5	EMI	DECIMAL	7,2	NOT NULL, CHECK (EMI >= 0)	Monthly Equated Installment amount for repayment.
6	DUES	DECIMAL	8,2	NOT NULL, CHECK (DUES >= 0)	Remaining amount to be repaid for the loan.
7	LN_RPY_SDT	DATE	-	NOT NULL	Date when loan repayment starts.
8	LN_STATUS	CHAR	1	CHECK (Status IN ('A','C')), DEFAULT 'Active', NOT NULL	Current status of the loan (A=Active or C=Closed).

9.BONUS TABLE

SNO	Column Name	Data Type	Size	Constraints	Description
1	BNS_ID	VARCHAR2	7	Primary Key, NOT NULL, UNIQUE	Unique identifier for each bonus or incentive record.
2	EMP_ID	VARCHAR2	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
3	BNS_TYPE	VARCHAR2	15	NOT NULL	Type of bonus or incentive (e.g., Performance, Annual).
4	BNS_AMT	DECIMAL	6,2	NOT NULL, CHECK (BNS_AMT >= 0)	The monetary amount of the bonus or incentive.
5	ISSUE_DT	DATE	-	NOT NULL	The date when the bonus or incentive was issued.
6	REMARKS	VARCHAR2	255	NULLABLE	Optional remarks or reason for the bonus issuance.

10.SALARY_SLIP

SNO.	Column Name	Data Type	Size	Constraints	Description
1	SAL_ID	VARCHAR	7	Primary Key, NOT NULL, UNIQUE	Unique identifier for each payslip record.
2	PRL_ID	VARCHAR	7	Foreign Key, NOT NULL	References the PayrollID in the Payroll entity.
3	EMP_ID	VARCHAR	6	Foreign Key, NOT NULL	References the EmployeeID in the Employee entity.
4	PAYM_MT_YR	VARCHAR	7	NOT NULL, CHECK (FORMAT MM/YYYY)	Month and year of the payslip, formatted as MM/YYYY.
5	SAL_BRKDOWN	TEXT	-	NOT NULL	A detailed breakdown of earnings and deductions (e.g., Basic Pay, HRA, Deductions).
6	TAX_DTLS	TEXT	-	NULLABLE	Additional tax-related details such as TDS, exemptions, etc.
7	NET_SAL	DECIMAL	10,2	NOT NULL, CHECK (NET_SAL >= 0)	Final net salary after earnings and deductions.
8	PAY_MODE	CHAR	20	NOT NULL, CHECK (PAY_MODE IN 'C','B','O')	Mode of payment for the salary (C='Cash', B='TO_BANK', O='Other').
9	TRANS_ID	VARCHAR2	30	NULLABLE	IF ONLINE PAY_MODE

GANTT CHART

Key Features of a Gantt Chart

1. **Tasks:** Listed on the left side of the chart.
2. **Timeline:** Shown at the top, divided into days, weeks, or months.
3. **Bars:** Horizontal bars on the chart represent each task and show its start and end dates.
4. **Dependencies:** Lines connecting tasks show the relationships between them (e.g., one task must finish before another starts).

Why Use a Gantt Chart?

- **Simple Visualization:** Easily see which tasks happen when and how they overlap.
- **Track Progress:** Monitor completed, ongoing, and upcoming tasks.
- **Manage Resources:** Assign tasks to team members and avoid conflicts.
- **Identify Dependencies:** Understand which tasks depend on others.

FUTURE SCOPE OF PROJECT

Future Scope for Desktop-Based Applications Using VB6.o

1. Enhancement of Payroll Management System:

- Add features like salary slip generation, tax computation, and integration with local database files (e.g., Microsoft Access) for enhanced performance.
- Include user-level access for administrators and employees to ensure data security.

2. Visitor Register:

- Build a desktop application to log visitor details with features like:
 - Entry/exit tracking.
 - Badge printing functionality.
 - Integration with barcode scanners or webcams.

3. To-Do List Application:

- Provide task prioritization, deadlines, and alerts through local notifications.
- Enable offline data storage for personal use, with import/export options for data backups.

4. SIP Calculator:

- Create a financial desktop tool for calculating systematic investment plans.
- Include features like customized financial reports, chart generation, and offline storage of user inputs.

5. Employee Target Management Tool:

- Develop a system for setting and tracking employee goals.
- Add a visual dashboard with progress charts and summaries.
- Incorporate a notification system for deadlines and milestones.

6. Task Organizer:

- Build an offline desktop app for task scheduling and time tracking.
- Allow users to categorize tasks and set recurring reminders using VB6's timer controls.

7. Event Management (Workshop Organizer):

- Create a desktop application for planning events with features like:
 - Attendee list management.
 - Schedule creation and session tracking.
 - Printing of event schedules or certificates.

8. Finance Planner

Some user inputs and automatically customized personal financial planning will appear.
